

P5-M

SPEC SHEET

Tungsten inserts to protect against undercutting

DESCRIPTION: The P5-M mortar raking blade is 6mm wide and has wear inserts to prevent undercutting and increase blade life.

FEATURES: 6mm Wide diamond segments and higher diamond concentration and tungsten wear inserts..

MACHINE SUITABILITY: Cordless and electric angle grinders.

STANDARDS:

- EN13236: European Standard that regulates the safety requirements for super abrasive (diamond) products.

USER TIPS:

- Make certain the blade is suitable for the material before cutting
- Guide the blade straight into the material
- Mortar raking creates a large amount of airborne dust. It is strongly advised that a machine with a fitted dust extraction guard is used, and coupled to a dust extraction unit, with a minimum specification of 'M class'. This is in addition to wearing the full and appropriate PPE.
