

BUILDING & ABRASIVE MATERIALS DRY DIAMOND CORES

SPEC SHEET

DESCRIPTION: The P4-DC dry diamond cores are suitable for all popular building materials such as general facing bricks, concrete blocks, breeze blocks, hand made bricks, building blocks and York stone.

FEATURES: Laser welded dedicated UK bond system, spiral barrel and 1/2" BSP female thread.

MACHINE SUITABILITY: Diamond core drills & SDSplus drills with slipping clutch.

STANDARDS:

• EN13236: European Standard that regulates the safety requirements for super abrasive (diamond) products.

USER TIPS:

- Ideally, use a dedicated dry diamond core machine with variable speed control and a slipping clutch
- No hammer action
- For harder materials and larger diameter cores use a slower RPM: for softer materials and smaller diameter cores use a faster RPM
- Clear debris from the hole at regular intervals to prevent the core from binding in the hole
- Do not force the core, let it do the work

PACKAGING DETAILS:

Full colour corrugated cardboard box.
