

**DUST CONTROL**

**SPEC SHEET**

**DESCRIPTION:** Simple and efficient way of controlling airborne dust, whilst dry core drilling. Because the dust is drawn at source this method is more effective than costlier dust swivel accessories. Additionally, both slotted or dry cores can be used. Simply attach to the hose of any suitable dust extraction unit and place against the surface and allow the dust plate to gain suction. For best results use on flat surfaces.

**PRODUCT DETAILS:**

Part No.	Description
DC11085	Small Dust Plate (28-92mm cores)
DC11086	Large Dust Plate (102-162mm cores)

Small dust plate (DC11085)

Large dust plate (DC11086)
