| TREE ROOTS 8 SOL PLASTIC PIPE RALLWAY SLEEPPERS | | | TERROSAL | IR |

DESCRIPTION: The TERRASAUR is a carbide cluster saw blade that tackles applications a chainsaw or diamond blade can't. It tears through a wide range of tough applications such as tree roots and soil, railway sleepers, groundwork, wooden boards, nails, screws, decking, fence panels, plastic, rubber, flat roofs, abrasive blocks and much more.

FEATURES: High grade tungsten carbide teeth and bi-rotational.

MACHINE SUITABILITY: Angle grinders and hand held saws.

USER TIPS:

- Make certain the blade is suitable for the material before cutting
- Carry out a slight forwards and backwards pendulum movement when cutting
- If heavy tree sap or another problematic material causes the blade to clog up, use a coarse wire brush to clean the teeth and steel core.
- N.B. The TERRASAUR blade is ideal for cutting through tree roots and soil in preparation for stump removal. However, the TERRASAUR should not be used for grinding large tree stumps; use a pupose designed stump grinder for this appliction.

PRODUCT DETAILS: Part No. **Dimensions**

DP16738 230 x 3.5 x 22.2mm (9") DP16740 300 x 3.8 x 20mm (12")
