### DESCRIPTION:

Suitable for cutting softwood, plywood, chipboard, Fibre Board (MDF) and PVC Plastics, the ST-JSB T101B has ground, tapered teeth for a fine, clean, and straight cut, in material thicknesses of 3mm to 30mm.

### FEATURES:

- Made from High Carbon Steel (HCS)
- Precision-ground teeth, with a Taper-ground body

### MACHINE SUITABILITY:

All T-shank Jigsaws, inc Makita, Bosch, Dewalt, Festool, Erbauer & Hikoki

### USER TIPS:

- Always wear the appropriate PPE
- Ensure you select the correct blade for your task
- Disconnect the power/ remove the battery prior to fitting or removing a blade
- If you have a variable speed Jigsaw, select faster speeds for soft materials, and slower speeds for harder materials such as Steel
- If your Jigsaw has an oscillating option, this will increase the speed of cut, but reduce the finish quality.
- Always ensure that the foot plate is flat to the surface before cutting
- When starting a cut, make gentle contact with the material, forcing the cut will cause the blade to jump and damage the teeth
- Once you have completed your cut, wait for the blade to stop, before removing from the material
- Blades that cut on the up stroke will leave a feathered edge to the surface of the material, but are smoother and easier to use. Select a reverse cut/ down cut blade to ensure a clean finish to the cutting surface.
