### DESCRIPTION:

The ST-MTB-9PCE Multi-Trade Multi-Tool blade set, consists of 5 of the most popular selling multi tool blades and a Starlock adaptor. The blades have been chosen with a broad spectrum of trades in mind, and to allow the cutting of the most common applications and materials for an oscillating multi tool.

### FEATURES:

- Ideal for Electricians, Plumbers, Builders, Tilers and more
- Ideal for Plunge Cutting
- Cuts a wide range of materials
- Appealing to a broad spectrum of trades

### MACHINE SUITABILITY:

Universal Fitting – Fits most brands of machine

### USER TIPS:

- Always wear the appropriate PPE
- Make sure that the blade is the correct fitting for your machine
- Ensure you select the correct blade for your task
- Avoid using excess pressure when cutting. Trying to force the blade to cut will reduce the speed of cut and overheat the blade
- Excessive heat build up can damage the blade. Using the full width of the blade when cutting can help to dissipate the heat, and prolong the life of the blade
- When cutting round objects such as waste pipe, select a wider blade than required to reduce the risk of the blade slipping during the cut
- To achieve clean, straight cuts, when plunge cutting, use a straight edge to support and guide the blade. Use a slight rocking motion to reduce surface resistance and increase the speed of cut
