

CARBIDE GRIT FOR GROUT REMOVAL

MULTI-TOOL BLADE

ST-MTB-CGB

DESCRIPTION:

The SiteTuff ST-MTB-CGB Carbide Grit Radial Segment Multi Tool blade provides an effective solution for removing tile grout and soft mortar. It also cuts marble, soft natural stones, plaster, resin and hardened adhesives.

FEATURES:

- Made from High Carbon Steel body (HCS) with Brazed Tungsten Carbide Grit
- Ideal for Tile Grout Removal

MACHINE SUITABILITY:

Universal Fitting – Fits most brands of machine

USER TIPS:

- Always wear the appropriate PPE
- Make sure that the blade is the correct fitting for your machine
- Ensure you select the correct blade for your task
- Avoid using excess pressure when cutting. Trying to force the blade to cut will reduce the speed of cut and overheat the blade
- Excessive heat build up can damage the blade. Using the full width of the blade when cutting can help to dissipate the heat, and prolong the life of the blade
- When cutting round objects such as waste pipe, select a wider blade than required to reduce the risk of the blade slipping during the cut
- To achieve clean, straight cuts, when plunge cutting, use a straight edge to support and guide the blade. Use a slight rocking motion to reduce surface resistance and increase the speed of cut

PRODUCT DETAILS:

PART NO.	BLADE WIDTH	WORKING LENGTH	PACK QTY	BLADE MATERIALS	MATERIAL APPLICATION
GT42143	82mm	Radial	1	Tungsten Carbide Grit	Tile Grout Removal

PACKAGING DETAILS:

Full colour corrugated cardboard box.
