

VACUUM BRAZED DIAMOND COATED RADIAL MULTI-TOOL BLADE

ST-MTB-DRB

DESCRIPTION:

Manufactured using industrial grade synthetic diamonds directly adhered to the blade body for maximum exposure, ST-MTB-DRB Vacuum Brazed Diamond Radial Blade is ideal for clean and efficient extended runs of tile grout removal, and creating curved cuts in materials such as Fibre Cement Board.

FEATURES:

- Made from High Carbon Steel body (HCS) with Vacuum Brazed Diamond Grain
- Radial design allows for smoother curved cuts
- Higher heat resistance
- Ideal for removing tile grout

MACHINE SUITABILITY:

Universal Fitting – Fits most brands of machine

USER TIPS:

- Always wear the appropriate PPE
- Make sure that the blade is the correct fitting for your machine
- Ensure you select the correct blade for your task
- Avoid using excess pressure when cutting. Trying to force the blade to cut will reduce the speed of cut and overheat the blade
- Excessive heat build up can damage the blade
- When using the ST-MTB-DRB to remove tile grout, ensure that the blade is narrower than the grout line, to avoid damage to the tiles
- When using the ST-MTB-DRB to remove tile grout, it can be beneficial to mask the edge of the tiles using masking tape, to reduce the risk of chipping the tiles

PRODUCT DETAILS:

PART NO.	BLADE WIDTH	WORKING LENGTH	PACK QTY	BLADE MATERIALS	MATERIAL APPLICATION
GT42147	88mm	Radial	1	Vacuum Brazed Diamond	Tile Grout Removal

PACKAGING DETAILS:

Full colour corrugated cardboard box.

Widely Recycled

IDEALLY SUITED
