WOOD - CLEAN HARDWOOD	<input type="checkbox"/>
WOOD - CLEAN SOFTWOOD	<input type="checkbox"/>

DESCRIPTION:

The versatile ST-MTB-TCT Tungsten Carbide Toothed (TCT) Multi Tool Blade is engineered for heavy duty cutting applications. Tough and durable, offering a long-lasting performance, tackling applications such as hardened screws and Nails, steel bolts, Sheet Metal, Non Ferrous Metals, Fibreglass and Fibre Cement Board.

FEATURES:

- Made from High Carbon Steel body (HCS) with Welded Tungsten Carbide Teeth (TCT)
- Heavy Duty Metal Applications
- Long Life
- Cuts a wide range of materials

MACHINE SUITABILITY:

Universal Fitting – Fits most brands of machine

USER TIPS:

- Always wear the appropriate PPE
- Make sure that the blade is the correct fitting for your machine
- Ensure you select the correct blade for your task
- Avoid using excess pressure when cutting. Trying to force the blade to cut will reduce the speed of cut and overheat the blade
- Excessive heat build up can damage the blade. Using the full width of the blade when cutting can help to dissipate the heat, and prolong the life of the blade
- When cutting round objects such as waste pipe, select a wider blade than required to reduce the risk of the blade slipping during the cut
- To achieve clean, straight cuts, when plunge cutting, use a straight edge to support and guide the blade. Use a slight rocking motion to reduce surface resistance and increase the speed of cut

PRODUCT DETAILS:

PART NO.	BLADE WIDTH	WORKING LENGTH	PACK QTY	BLADE MATERIALS	MATERIAL APPLICATION
GT42141	35mm	40mm	1	Tungsten Carbide Teeth	Heavy Duty Metal

PACKAGING DETAILS:

Full colour corrugated cardboard box.

Widely Recycled
