

P6-ATD

SPEC SHEET

Manufactured to
EN13236

DESCRIPTION:

Our range of auto-cool diamond tile drills are filled with a lubricating wax. During the drilling process the leading edge of the wax melts and autocoals the diamonds, meaning there is no need to apply a secondary coolant, such as water. With hexagonal fitting for use in cordless and corded drills.

FEATURES:

- Fully exposed diamond joined by a vacuum process
- A wax lubricant, injected into the hollow centre of the bit, aids smaller diameters, for a smooth and speedy experience.

MACHINE SUITABILITY:

Cordless and corded drills.

STANDARDS:

EN13236: European Standard that regulates the safety requirements for super abrasive (diamond) products.

USER TIPS:

- Mark the tile and place the drill tip at a 45-degree angle
- Start drilling and level the drill once the tile surface is scored
- Drill using a slight oscillating motion until the hole is complete
- Do not use unnecessary pressure, the weight of the machine is sufficient
- Use at speeds between 800 - 2000rpm
- For harder tiles use a slower rpm / for softer tiles use a faster rpm.

PART NO. DIMENSIONS

DP19000 5 x 67mm

DP19005 6 x 67mm

DP19010 7 x 67mm

DP19015 8 x 67mm

DP19020 10 x 80mm

DP19025 12 x 80mm

PACKAGING DETAILS:

Full colour corrugated cardboard box.
