

# SCAFFOLDING/ HEAVY DUTY METAL RECIPROCATING SAW BLADE

## ST-RB S927BEF

### SPEC SHEET

#### DESCRIPTION:

The SCAFFCUT's 25mm wide concaved blade delivers fast and precise cuts through galvanised steel scaffold tube with ease. With an 8% Cobalt content, the cutting edge is more durable, heat resistant and offers longer life, giving an excellent cutting performance through steel products with a thickness between 2 and 6mm.

#### FEATURES:

Concaved Cutting Edge, for constant contact with the material, 8% Cobalt content for greater heat resistance and longer life, S-Shank fitting

#### MACHINE SUITABILITY:

All S-shank Reciprocating Saws, inc Makita, Bosch, Milwaukee & Dewalt

#### USER TIPS:

- Always wear the appropriate PPE
- Ensure you select the correct blade for your task
- Disconnect the power/ remove the battery prior to fitting or removing a blade
- Adjust the shoe to the desired cutting depth and ensure that it is firmly placed against the material before cutting
- Always use two hands to hold and support the machine whilst in use
- Allow the blade to make the cut – Excessive downward pressure will slow the cutting speed and increase the risk of the blade overheating, prematurely blunting the blade.
